ABOUT

Demographers study issues like:

· The impact of preschool programs on school readiness.
· Effects of state-mandated insurance for fertility treatment.
· Connections between the minimum drinking age and mortality.
· Influenza mortality among the elderly.
· Minimum wage effects on young and less-skilled workers.

Their findings impact our day to day lives through public policy changes.

WHY UCI DASA?

The one-year DASA program provides working professionals and recent graduates training in practical research skills needed to address analytical problems confronting society, business, government, and the nonprofit sector. Because personal behavior "scales up" into population trends, and population trends "scale down" to impact individuals, demography touches all facets of life. The study of demography offers a versatile approach for analyzing a broad range of social and economic issues.

research specialties:

education • life course • pollution transportation • housing • immigration population • health • economy • race & ethnicity

placement:

U.S. Census Bureau | RAND | Migration Policy Institute | Facebook |University of Chicago | UC Irvine |Google | Amazon National Football League | Penn State

program:

• Master's in Social Science
• Completed M.A. in 9 months
• Full-time, 9-course program

master's program in

DEMOGRAPHIC & SOCIAL ANALYSIS

University of California, Irvine
